Towards new European military helicopter programmes

EUROSATORY – Hall 5- Salles 503-502 – Paris-Nord Villepinte Exhibition Center
Parc d'Expositions, F-95970 Paris, Île-de-France, FRANCE

Today it is urgent to decide and implement the renewal of the military helicopter fleet through European cooperation, and to harmonize requirements.

The aim of this International Forum will be to present the recommendations of the Air and Space Academy to the main players in the sector: military, equipment manufacturers and industrialists.

The debates and exchanges between the main players will be conducted in an open manner at European level.

FLIGHT PLAN

To encourage open debate for participants to express their visions and concerns, a session will be exclusively reserved for discussion and exchanges.

Speakers at this event will include :

Session 1: **New European military helicopter programs** by **Bernard FOUQUES**, AAE

Session 2: **An evolution of operational needs** by **General Olivier de la MOTTE** and **Major General Reinhard WOLSKI**

Session 3: **Technical Perspectives, through Cleansky** by **Michel HANCART**, AAE and **Eric DAUTRIAT**, AAE
Management of a military programme in cooperation: example of OCCAR by **General Patrick BELLOUARD**, former OCCAR director

Session 4: **The industry point of view:**

AIRBUS helicopters, **Jérôme COMBE**, H/O Portfolio Policy and Strategy;

Leonardo Helicopters, **Andrea BIANCHI**, Strategy & Innovation;

Safran Helicopter Engines, **Florent CHAUVANCY**, Executive Vice-president, OEM sales & marketing

The forum is followed by a public roundtable discussion in the exhibition hall. The participants in the round table will be high ranking persons from: ALAT, AED, OCCAR, industrial Strategy /military programmes.

** About the Air and Space Academy **

The Air and Space Academy, created in 1983 in Toulouse, is composed of personalities who hold or have held important responsibilities in the fields of aeronautics and space. Through a variety of activities – international conferences and forums, training courses, European lecture cycles, publications and awards, AAE aims to encourage and promote high-quality scientific, technical, cultural and human activities in these areas.
